SUMMARY

Cybersecurity researcher and OSCP-certified penetration tester with an active Secret clearance and nearly 3 years supporting classified Navy and Air Force IT environments as a DoD contractor. Focused on Windows exploit development, Active Directory attacks, and AI/LLM security, backed by hands-on DISA STIG compliance automation.

EDUCATION & CERTIFICATIONS

WESTERN GOVERNORS UNIVERSITY – Bachelor of Science, Cybersecurity and Information Assurance April 2025

OffSec: Offensive Security Certified Professional (OSCP)

CompTIA: CySA+, PenTest+, and Security+ (DoD 8140/8570 approved); Network+, A+, Cloud Essentials+, Project+

Cloud: Microsoft Azure Fundamentals (AZ-900); AWS Certified Cloud Practitioner

EXPERIENCE

PRIME TECHNICAL SERVICES – Contractor, Naval Station Newport Newport, RI
Classified Senior IT Field Service Technician July 2024 – Present

- Upgraded endpoints as part of an enterprise-wide Windows 11 migration spanning approximately 7,000 devices.
- Onboarded approximately 3,000 new devices into the enterprise as a key contributor to the deployment effort.
- Maintained and updated classified systems in compliance with classified information handling and security policies.
- Partnered with IT teams to integrate classified systems into the enterprise infrastructure and ensure interoperability.
- Diagnosed and resolved network connectivity issues involving TCP/IP, DHCP, DNS, and VPN.

CENTURIA – Contractor, Hanscom Air Force Base Bedford, MA
Classified IT Field Service Technician & PKI Analyst January 2024 – July 2024

- Administered daily Public Key Infrastructure (PKI) operations, including certificate issuance, renewal, and revocation.
- Managed the cryptographic key lifecycle (generation, distribution, and destruction) in line with security guidelines.
- Resolved operating system and software issues across Windows, macOS, Linux, and Microsoft 365.
- Developed PowerShell scripts to automate routine troubleshooting tasks.

PROJECTS

Windows Dynamic Analysis & Exploit Development Lab Project

- Analyzed Windows executables at runtime with x64dbg, WinDbg, and Sysinternals to identify logic flaws.
- Built Python proof-of-concept exploits that reproduce each flaw reliably in an isolated lab.

Active Directory Penetration Test Lab Project

- Achieved full domain compromise in a simulated Active Directory penetration test and documented all findings.

DISA STIG Compliance Automation Lab Project

- Automated DISA STIG hardening for RHEL and Windows Server with idempotent Ansible playbooks.
- Verified compliance with OpenSCAP scans, remediating failed rules and re-scanning to raise compliance scores.

TECHNICAL SKILLS

Offensive Security: Metasploit, BloodHound, Burp Suite, Nmap, x64dbg, WinDbg, Ghidra, IDA, Sysinternals

Defense & Compliance: DISA STIGs, OpenSCAP, Ansible, PKI and cryptographic key management

Languages: Python, PowerShell, C, Assembly

Platforms & AI: Windows, Windows Server, Active Directory, Linux (RHEL), AWS, AI agents, prompt engineering
